## **DETAILED ACTION**

## Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 8, drawn to a cultivation method.

Group II, claim(s) 5-7, 30, drawn to a cultivation method.

Group III, claim(s) 9, 12 drawn to an ipomoea aquatica.

Group IV, claim(s) 10, 11, 31 drawn to an ipomoea aquatica.

Group V, claim(s) 13 drawn to a processed food of ipomoea aquatica.

Group VI, claim(s) 14, 15, drawn to a vegetable preserving method.

Group VII, claim(s) 16-19, drawn to a vegetable preserving method.

Group VIII, claim(s) 20-22, drawn to an ipomoea aquatica preserving method.

Group IX, claim(s) 23, drawn to fish oil processed food.

Group X, claim(s) 24, drawn to a processed food.

Group XI, claim(s) 25-26, drawn to a processed food.

Group XII claim(s) 27-28, drawn to an extract of ipomoea aquatica.

Group XIII, claim(s) 29, drawn to a processed food.

Art Unit: 1794

3. For U.S. national stage applications under 35 U.S.C. 371, the inventions listed as Groups I-XIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons.

4. Groups I-XIII lack unity of invention because there is no technical feature that is common to all the claims. Group I requires classifying ipomoea aquatica by the color, shape and width of the leaves that is not required by all the claims. Group II requires the identification of the roots that is not required by all the claims. Group III requires a curved line from leaf base to leaf top and a processed food thereof that is not required by all the claims. Group IV requires no discolorations after heating or freezing and a processed food thereof that is not required by all the claims. Group V requires the discoloration of the bud, stem, and leaf after being heated is excluded as raw material that is not required by all the claims. Group VI requires an unprocessed vegetable and the maceration of a cut surface, vegetable distribution and light shielding that is not required by all the claims. Group VII requires blanching, macerating, addition of alcohol (ethanol) at a temperature and freezing that is not required by all the claims. Group VIII requires classifying ipomoea aquatica by the color, shape, width of the leaves and blanching, macerating, addition of alcohol and freezing that is not required by all the claims. Group IX requires fish oil that is not required by all the claims. Group X requires extracts of ipomoea aquatica that is not required by all the claims. Group XI requires water with a specific degree of hardness that is not required by all the claims. Group XII requires an oxygen eliminating ability that is not required by all the claims.

Group XIII requires water containing oxalic acid or oxalate that is not required by all the claims.

- 5. A telephone call was made to Steven Rabin on 10/16/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
- 7. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
- 8. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.
- 9. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to

Art Unit: 1794

be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saeeda Latham whose telephone number is 571-270-1154. The examiner can normally be reached on Monday to Thursday 8:00AM 5:00PM EST.
- 11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
- 12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

Art Unit: 1794

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
